QUICK REFERENCE

The BI-RADS score is an acronym for the Breast Imaging Reporting and Database System score. It's a scoring system radiologists use to describe mammogram results. A mammogram is an X-ray imaging...

BI-RADS Score: Understanding Your Mammogram Results

BI-RADS (Breast Imaging-Reporting and Data System) is a risk assessment and quality assurance tool developed by American College of Radiology that provides a widely accepted lexicon and reporting schema for imaging of the breast. It applies to mammography, ultrasound, and MRI. This article reflects the 5th edition, published in 2013 1.

Breast imaging-reporting and data system (BI-RADS ...

The ACR BI-RADS Atlas 2013 (4) is the updated version of the 2003 Atlas. BI-RADS® is designed to standardize breast imaging reporting and to reduce confusion in breast imaging interpretations. It also facilitates outcome monitoring and quality assessment.

The Radiology Assistant : Bi-RADS for Mammography and ...

BI-RADS is a scheme for putting the findings from mammogram screening (for breast cancer diagnosis) into a small number of well-defined categories. Although BIRADS started out for use with breast screening mammography, it was later adapted for use with Magnetic Resonance Imaging (MRI) and breast ultrasound (US) as well.

BIRADS 2 3 4 and 5: What does it mean?

Doctors use a standard system to describe mammogram findings and results. This system (called the Breast Imaging Reporting and Data System or BI-RADS) sorts the results into categories numbered 0 through 6. By sorting the results into these categories, doctors can describe what they find on a mammogram using the same words and terms.
