Breast Cancer Sharing The Decision

Breast Cancer: Sharing the Decision uniquely examines the complexities of facilitating patient participation in treatment decisions. Much of the book is devoted to relating the experience of healthcare professionals involved in the care of women with breast cancer, but it also summarises the theory and research evidence suggesting that the integration of patients' values and priorities into treatment decisions can have a positive impact on treatment outcome and quality of life.

Seeking informed consent to cancer clinical trials presents a very challenging area of communication for oncologists and their patients, particularly discussing complex issues such as randomization. 22 , 23 Promoting shared decision making is especially important in this context as cancer patients face complex information and difficult decisions at a time of heightened anxiety. Further research is warranted to explore the utility of the DAS-O in complicated trial discussions.

Sharing decisions in breast cancer care: Development of ...

These seven breast cancer survivors share why they chose breast reconstruction, and how they feel about their decision today. "It's my decision and it's my body." Deciding whether to have breast reconstruction or not can be a tricky topic that many people—from your cancer treatment team to total strangers—will have opinions on. The input can be overwhelming and contradictory (and sometimes unwanted), but the choice is really in your hands.

I had a busy year planned for 2020. I'm a gynecologic surgeon seeing patients and trying to build a badly needed menopause clinic in a local hospital here in Seattle. I'm editing a book, and consulting and providing telemedicine care for women in menopause as Chief Medical Officer at Gennev. But then in January, I got a diagnosis of breast cancer, and suddenly I was making new plans.

I'm A Physician Who Had Breast Cancer: Here Are My Thoughts
