grammatical constructions play a central role in the relation between the form and meaning of simple sentences. She demonstrates that the syntactic patterns associated with simple sentences are imbued with meaning—that the constructions themselves carry meaning independently of the words in a sentence.

Constructions: A construction grammar approach to argument ...

Construction grammar is a sociobiological family of theories within the field of cognitive and evolutionary linguistics. These posit that human language consists of constructions, or learned pairings of linguistic forms with meanings.

This chapter highlights the fundamental assumptions shared by all constructionist approaches, distinguishing them from mainstream generative grammar. In particular, phrasal constructions, like traditional lexical items, are learned pairings of form and function. Grammar does not involve any transformational or
