Understanding Corneal Nerve Function—and Dysfunction

Cranial nerves are responsible for the control of a number of functions in the body. Some of these functions include directing sense and motor impulses, equilibrium control, eye movement and vision, hearing, respiration, swallowing,

Download Free Cranial Nerves Function And Distribution

smelling, facial sensation, and tasting. The names and major functions of these nerves are listed below.

Names, Functions, and Locations of Cranial Nerves

There are four cranial nerves with primarily motor function. Link to Corticobulbar. CN IV, Trochlear, innervates the superior oblique muscle of the eyeball.
