Organ transplantation is dependent on death of the body, but death does not mean the termination of the relationship with the previous embodied self. For instance, it is widely recognised that pronouncing death does not cause the immediate separation of self from body, and therefore ties to the deceased 'self' persist (Klass et al. 1996 ...

Evidence for the disposal of the dead is one of the most common classes of archaeological data; in both prehistoric and historic contexts, archaeologists have long used the remains of death and...

The Archaeology of Death - John Disney Professor of ...

Taking cues from current theoretical perspectives and capitalizing on the strengths of new and sophisticated methods of analysis, Breathing New Life into the Evidence of Death showcases the vibrancy of bioarchaeological research and its potential for bringing "new life" to the field of mortuary archaeology and the study of human remains. These new trajectories challenge old stereotypes, redefine the way research of human remains should be accomplished, and erase the divide that once ...

Breathing New Life into the Evidence of Death ...

Under the influence of phenomenological approaches, a semiotic perspective on the body is being replaced in archaeology by analysis of the production and experience of lived bodies in the past through the juxtaposition of traces of body practices, idealized representations, and evidence of the effects of habitual gestures, postures, and consumption practices on the corporal body. On the basis ...
