stutter, not quite a stall, and it doesn't matter if the engine is hot, cold, or low on gas. There are a number of possible causes, but you're going to have to take a good look at your engine to try and diagnose the problem.

### **Why Does My Car Hesitate When I Press the Gas?**

## Where To Download Engine Problems Diagnosis

Diagnosis: If the engine fires up and immediately dies, then you probably have a problem with your carburetor. The engine starts because it can burn the fuel you just sprayed directly into the carburetor, and it dies when that fuel burns off. This means that carburetor is not properly delivering fuel to the engine.
