Educational Research and Evaluation: Vol 25, No 3-4

Measures of worker productivity can give important insights into how workers perform and how workplaces should be organized. Direct measures of productivity are used to study a range of questions, such as the effects of incentives on workers' productivity, the influence of peers on behavior, or the accumulation of human capital on the job.

Performance measures and worker productivity

participation and equity. The board uses the evaluation findings to build on successes of the program and to share outputs and short-term outcomes with partners. In addition, the findings often lead to changes in board activities, policies or research focus. Conducting annual evaluations

Understanding the Implications of Online Learning

Also known as program evaluation, evaluation research is a common research design that entails carrying out a structured assessment of the value of resources committed to a project or specific goal. It often adopts social research methods to gather and analyze useful information about organizational processes and products.

Evaluation Research Design: Examples, Methods & Types

Evaluation is a process that critically examines a program. It involves collecting and analyzing information about a program's activities, characteristics, and outcomes. Its purpose is to make judgments about a program, to improve its effectiveness, and/or to inform programming decisions (Patton, 1987). Should I evaluate my program?
