Hermann Fendt built the first "dieselross" (diesel horse) in his father's shop using a stationary engine and an old mower in 1928. The Fendt Dieselross became a popular tractor and the company grew in the 1930s and 40s to become a major brand. Fendt's innovation, particularly with its Vario transmission and Xylon chassis, carried the company forward.

The Vario transmission was first developed in the 1970s, but due to lack of funding it was never seen on a production tractor until 1996, when Fendt launched the revolutionary Fendt 926 Vario. This was the first ever stepless transmission to be launched in the tractor market, and is patented to be the only truly stepless transmission when it was first developed.
