fSAN Design Basicsf on page 11. SAN Basics. A SAN is a specialized high-speed network of storage devices and switches connected to computer systems. This white paper refers to the computer systems as servers or hosts. A SAN presents shared pools of storage devices to multiple servers. Each server can access the storage as if it were directly attached to that server.

**SAN Conceptual and Design Basics - VMware**  
HP has a their "SAN Design Reference Guide". You can find it on the SPOCK site: <http://h20272.www2.hp.com/> That said, it doesn't tend to give the best of advice on all points. The biggest contention I've always seen is that it recommends putting multiple devices in the same fabric zone.
