This code tells you that the engine is running too fast and the sources for this code could be one of the following reasons: air leak at the intake, carb, and linkages not properly installed, misadjusted governor, broken governor.

How to Read Onan Generator Fault Codes (Cummins Blink Code)

If that happens to be the case, the " Onan generator starts then shuts down " issue could be taken care of by replacing the unit control board. 3. Flawed Regulator. If field flash voltage seems pretty normal, the regulator could be the source of problem which you could determine simply by running 12 volts through a diode to the regulator ...

Top 5 Causes of Onan Generator Starts Then Shuts Down Issue

Access Free Onan Shuts Down Code 33 If your Onan generator isn't running, it may be because fuel levels are too low. While some RV generators will run until the fuel tank has nothing but fumes, the Onan models tend to stop working when you're down to a quarter tank. The units that do this are the ones drawing from the gas tank.

Onan Shuts Down Code 33 - u1.sparksolutions.co

That is because many generator models are designed to shut down if there is a quarter of a tank of fuel left in the tank. But gas issues may not be the only reason why your Onan generator shuts down soon after it starts. You could be having an electrical or carb issue. If it is the carb, then you should have some sputtering before it dies.
