Floyd, 1990, Principles of Electric Circuits, 4th edition, Electron Flow Version. In fact, it makes no difference which way current is flowing as long as it is used consistently. The direction of current flow does not affect what the current does. In general, high school Physics and two year technician programs use Electron Flow. But three year technologist and university engineering

6.002 is designed to serve as a first course in an undergraduate electrical engineering (EE), or electrical engineering and computer science (EECS) curriculum. At MIT, 6.002 is in the core of department subjects required for all undergraduates in EECS. The course introduces the fundamentals of the lumped circuit abstraction. Topics covered include: resistive elements and networks; independent ...
