These amp bypass harnesses allow you to use the power from the new car stereo to drive your speakers and not rely on factory power. These harnesses tend to be more affordable than amplifier integration adapters (below), but can involve more work if the amplifier is in a remote location, like under a seat or in the trunk.

### Guide to Car Stereo Wiring Harnesses - Crutchfield

Sensors are a critical safety feature but can prevent an automatic garage door from working properly. If your sensors or garage door motor is blinking or your door doesn't close, it's a sign you could have faulty sensors. Luckily, you can set most automatic garage doors to a manual mode to bypass the sensors.

### 3 Ways to Disable a Garage Door Sensor - wikiHow

im not interested in just taking the belt off. i am not running ac either. my power steering pump is currently out of the car. im wondering if disconnecting both the lines going from the pump to the power steering gear, and putting one line connecting the two would work. with out damaging anything.

### power steering delete | Dodge SRT Forum

Using a pickle wrench, slide the forks in between the top of the power steering control valve and the pitman arm. Pry the fork down so that the power steering control valve "pops" off the pitman arm easily. Step 11: Unscrew the power steering control valve from the control arm drive link. The power steering control valve's primary connection is screwed into the control arm.

### How to Replace a Power Steering Control Valve ...

The wiper switch wiring harness plug is located to the left of the steering column, it has five wires in it. They are as follows: white(12V ignition), grey (low speed), yellow (wiper park), purple (high speed), pink (wash). I made an extension harness to reach to the upper corner of the dash so that I would have 3 12V leads, 2 park leads, 1 low ...

### How to wire wiper motor | 5-10 Forum

If you want to bypass your antitheft, you can attach one of your PATS keys inside your steering collumn by the lock cylinder. This will make the car always 'see' a key with a chip. You caqn then use a regular steel key. This is also a 'cheater' fix when installing remote starts on cars with PATS so you don't need to buy a module.
