Statistics And Data Analysis For

Data scientists and statisticians typically define "data analysis" in different ways. For a data scientist, data analysis is sifting through vast amounts of data: inspecting, cleansing, modeling, and presenting it in a non-technical way to non-data scientists. The vast majority of this data analysis is performed on a computer.

Difference between Data Analysis and Statistical Analysis ...

There are few well know statistics are the average (or "mean") value, and the "standard deviation" etc. Standard deviation is the variability within a data set around the mean value. The "variance" is the square of the standard deviation. The linear trend is another example of a data "statistic".
