## **Truss Stabilizer Installation Guide**

The Stabilizer truss brace and spacer is easily installed with a framing hammer. Just drive the top flap down into the top edge of the truss member to be braced (see Hammer Here 1 in Chord Attachment Detail shown below). The Stabilizer is properly installed when the top flap and side tabs are flush with the member being braced, and the teeth

The 31-24 Stabilizer 24" Truss Brace and Spacer (50/Box) provides temporary construction bracing in the roof and ceiling planes, as well as permanent lateral bracing for webs as specified by your truss engineering. They are easily installed by embedding the patented MII 20 teeth on the top flange straight into the edge of the truss member to be braced with a framing hammer.
